WORK EXPERIENCE

Ayasofyazılım, Kocaeli – Frontend Team Lead & DevOps

FEB 2025 – PRESENT

- Managed the development of comprehensive tax-free and traveller applications using Next.js (AppRouter), Auth.js, and TypeScript.
- Managed the roles and work distribution of the Frontend team.
- Took part in the project management/development steps of the tax-free application.
- Created an npm package for creating Next.js clients with OpenAPI Swagger using HeyAPI and oversaw the publishing stages.
- Managed company-wide deployment (Coolify-Docker), server setup (Ubuntu), backup, firewall, DNS, and WAF processes.
- Managed the domain access of company applications using Caddy reverse-proxy.
- Contributed to research and development processes in projects suitable for TÜBİTAK calls within the company.
- Completed real-time product reading and cart creation developments for the AyShopGo project using MedusaJS, TypeScript, Next.js, and Supabase Realtime.
- Established the in-house documentation infrastructure using Astro Starlight.
- Completed the external documentation setups using Docmost.
- Completed the branding work (logo, color palette, business cards, etc.) for the Tax-free platform project.
- Developed the landing projects for Ayasofyazılım and Unirefund using Next.js, Strapi, and TypeScript.

Ayasofyazılım, Kocaeli – Frontend Developer & DevOps

JAN 2022 – FEB 2025

- Led front-end development on a corporate crowdfunding platform using React, Next.js (App Router), AuthJS, and TypeScript; implemented i18n and SSR/CSR strategies.
- Completed the development of e-document integrations for the Faturaturka project using jQuery and Vanilla Javascript.
- Created reusable template strings with Scriban.
- Created and completed the development of Bluetooth printer (ESCP0S) – front-end connections.
- Developed the CI/CD processes and wrote E2E tests for the projects I contributed to, using GitHub Actions and Playwright.
- Completed a full-stack support application from scratch using MAUI Blazor and .NET and provided Jira API integration.

Freelance – UI/UX, Frontend Developer

JAN 2018 – JAN 2022

- Completed the logo and business card branding work for cansocialmedia using Figma, Illustrator, and Photoshop.
- Completed the development of cansocialmedia's corporate website using Next.js and TypeScript.
- Completed the UI/UX processes for the mobile and web interfaces of Gymosfer company.
- Completed website developments for numerous individual clients.
